

Presentation Peer Review Instructions

Overview

The goal of this peer review is for you to evaluate the efficacy of the communication and framing of the project in the presentation video. It is **not** to evaluate the content of the project itself.

Instructions

You should be prompted to review two videos in Canvas starting on 12/10. Submit your reviews there (they will appear as anonymous comments to the reviewed group).

Note: If you do not see the prompt or the instructions are not clear, reach out to Prof. Srikrishnan ASAP. You **will not** be able to submit reviews after the due date.

Your review should, in the equivalent of no more than 1 page, answer the following questions:

- How well did you understand the key question of the project? Can you restate it?
- What were the key results (be specific; do not just repeat the video!)?
- What were three things the presenters did well (be specific!)?
- What were three things the presenters could have done better (be specific!)?

Conclude with an overview rating: 1. Excellent; 2. Fine as is; 3. Needs some improvement; 4. Needs a lot of improvement.

Submission

Submit your reviews to Canvas by 9:00 PM on the due date.
